INTRODUCTION

In 2000 a list of 51 core competencies required for colposcopic practice was determined by experts from 21 countries through a Delphi study.

In view of changes in colposcopic practice that have occurred over the past decade and the expansion of the European Federation of Colposcopy (EFC), the decision was made for a review of the contents of the training curriculum and to repeat the Delphi study in order to gain approval for any changes from the EFC membership.

Methods

In 2000 a list of 51 core competencies required for colposcopic practice was determined by experts from 21 countries through a Delphi study.

In view of changes in colposcopic practice that have occurred over the past decade and the expansion of the European Federation of Colposcopy (EFC), the decision was made for a review of the contents of the training curriculum and to repeat the Delphi study in order to gain approval for any changes from the EFC membership.

Core curriculum (n=50)

- Basic skills (9)
- Colposcopic examination (10)
- Colposcopic features (16)
- Practical procedures (7)
- Administration (2)
- Communication (6)

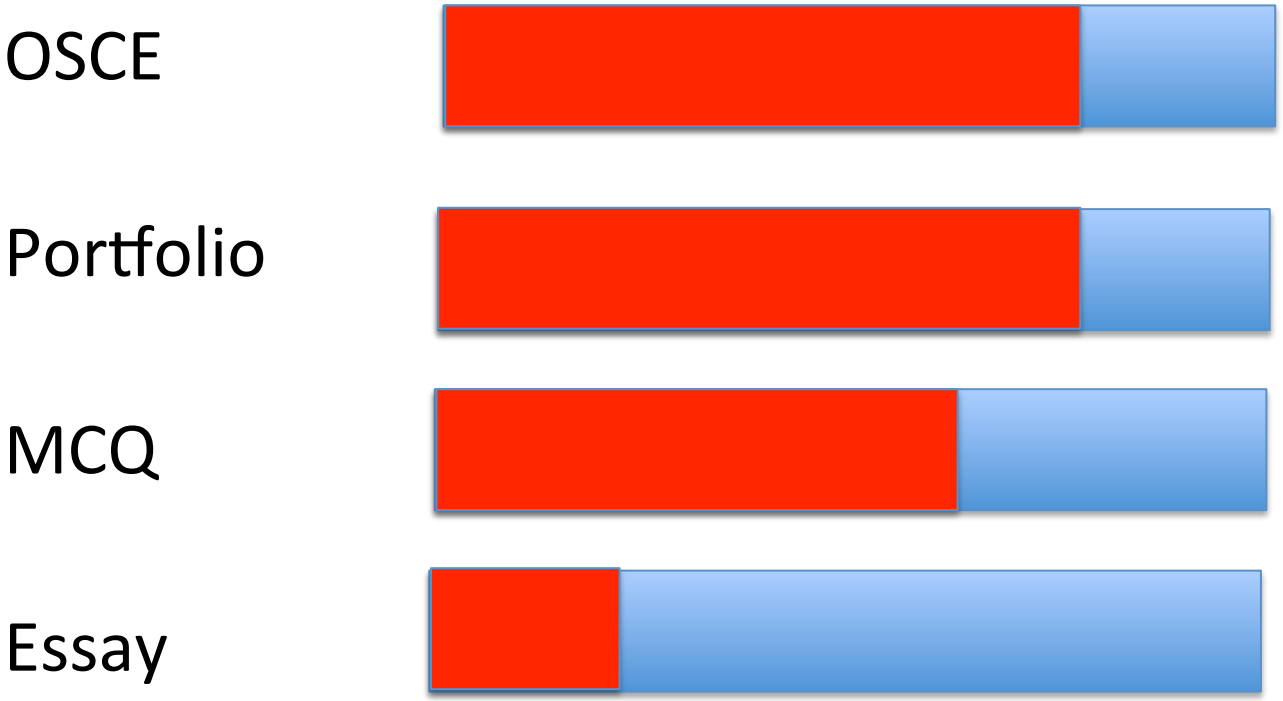
Assessment/Quality Assurance



European Diploma?

1975 Concept of mutual recognition of qualifications raised

2005 Automatic recognition of medical training with EC

2010 Berlin EFC meeting: support for concept of Colposcopy Diploma

2011 EFC Training Survey (19/21)

European Certificate

National Colposcopy Training Programmes

EBCOG Training Recommendation

EBCOG
The European Board and College of Obstetrics and Gynaecology

Standards of Care for Women's Health

All colposcopists should have had formal training and be recognised or certificated as suitable to practice colposcopy. All European training programmes should comply with European Federation for Colposcopy (EFC) training standards.
